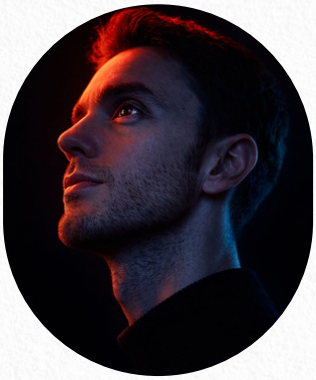
FRANCISCO LARROSA

DESARROLLADOR FRONTEND SSR



Franciscolarrosa22@gmail.com

+542494370109

Buenos Aires - Tandil

ABOUT ME

Frontend Engineer with 4+ years of experience building scalable, high-performance web applications using Angular (v14–21) and Tailwind CSS. Specialized in modern Angular architecture with Signals and SSR, focusing on performance optimization, clean code, and reusable component design.

Experienced in integrating RESTful APIs, implementing robust testing strategies (Jest, 85%+ coverage), and working in containerized environments with Docker and Linux. Strong collaboration with backend teams and participation in delivering end-to-end solutions.

Continuously learning and applying modern frontend best practices to create efficient, maintainable, and user-focused applications.

SKILLS

- Desarrollo con Angular (v14–21)
- TypeScript / JavaScript
- Tailwind CSS / Angular Material
- Signals y SSR (Angular 21)
- Git / GitHub / GitLab
- Firebase (Auth y Firestore)
- Docker y configuración de contenedores
- Linux (Ubuntu) y despliegue en Tomcat
- Performance optimization
- Scalable architecture
- Reusable components
- Clean code principles
- REST API integration
- Unit testing (Jest)

LANGUAJES

- Español (nativo)
- Inglés (intermedio - lectura técnica, documentación, escritura)

PROFESSIONAL EXPERIENCE

Desarrollador Frontend SSR

7 Ideas Software - Agosto 2022 – Actualidad

- Developed and maintained scalable Angular applications (v14–21) with a strong focus on performance and user experience.
- Built reusable and modular UI components using Tailwind CSS, improving development efficiency and consistency.
- Integrated RESTful APIs ensuring type safety and robust error handling.
- Implemented SSR and modern Angular Signals to optimize performance and state management.
- Collaborated with backend teams and supported deployment of Java applications on Tomcat servers..

PROFESSIONAL EXPERIENCE

Desarrollador Frontend SSR (Contractor) – Mindata

Landing Gastronomica - RIU – Agosto 2025 - Noviembre 2025

- Developed a modern SPA using Angular 21 with Standalone Components and Signals, optimizing state management without NgRx.
- Designed and implemented custom directives to enhance user interaction and DOM behavior.
- Built HTTP interceptors for centralized error handling, request management, and global loading states.
- Integrated REST services with strict typing and fallback mechanisms to ensure application stability.
- Implemented unit testing with Jest (85%+ coverage), improving code reliability and maintainability.
- Applied clean architecture principles, organizing code into domains, services, helpers, and shared modules.

PORTAFOLIOS

En los siguientes links se pueden ver mis portafolios y algunos de mis trabajos
Portfolio personal creado con Angular 21 + Tailwind CSS, orientado a UI/UX responsive, SSR y proyectos destacados.
