

FRANCISCO LARROSA

Angular Frontend Developer

Tandil, Buenos Aires, Argentina | +54 249 437 0109 | Franciscolarrosa22@gmail.com [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Angular Frontend Developer with 4+ years of experience building, maintaining and modernizing production web applications across Angular v14-v22. Specialized in Angular 22, TypeScript, RxJS, Signals, Standalone Components, Server-Side Rendering and strongly typed REST API integrations. Focused on scalable architecture, performance optimization and maintainable codebases backed by comprehensive unit testing.

EXPERIENCE

Angular Frontend Developer

Aug 2022 – Present

7 Ideas Software · Full-time

- Develop and maintain production Angular applications across versions v14-v22, focused on performance, scalability and user experience.
- Modernize legacy Angular implementations using Standalone Components, Signals and modern template syntax.
- Build modular, responsive UIs with Angular Material, Tailwind CSS, HTML5 and CSS3, and create reusable components/directives to reduce duplicated logic.
- Integrate RESTful APIs using Angular HttpClient and RxJS with strict TypeScript typing; implement HTTP interceptors, centralized error handling and predictable async data flows.
- Develop complex Reactive Forms with custom validations and dynamic, strongly typed controls.
- Apply Server-Side Rendering, lazy loading, route-level code splitting and change detection optimizations.
- Collaborate closely with Java backend teams, support deployments on Tomcat, and work with Docker/Docker Compose in Ubuntu Linux environments.
- Participate in code reviews and Agile ceremonies (Scrum/Kanban) with cross-functional teams.

Angular Frontend Developer — Contractor

Aug 2025 – Nov 2025

Mindata | Landing Gastronómica — RIU · Freelance, concurrent with full-time role at 7 Ideas Software

- Built a production-ready SPA using Angular 21, TypeScript, Standalone Components and a signal-based state management approach with no unnecessary external dependencies.
- Designed custom Angular directives to improve user interactions, DOM behavior and code reusability.
- Created HTTP interceptors for centralized error handling, request management and global loading states.
- Integrated RESTful services with strictly typed models and fallback mechanisms to improve stability.
- Implemented unit tests with Jest, achieving 85%+ test coverage, in an Agile environment with designers and backend developers.

PROJECTS

Personal Portfolio

Angular 22 · TypeScript · Tailwind CSS

- Designed and built a responsive personal portfolio with Server-Side Rendering, Standalone Components, Signals and reusable UI components.
- Focused on accessibility, performance and clear project presentation to demonstrate practical Angular and component-architecture experience.

TECHNICAL SKILLS

Frontend: Angular v14-v22, TypeScript, JavaScript, RxJS, HTML5, CSS3

Modern Angular: Standalone Components, Signals (computed, effect), Signal Inputs/Outputs, Reactive Forms, Modern Control Flow, Lazy Loading

Rendering & Performance: Server-Side Rendering, Hydration, Prerendering, OnPush Change Detection

UI & Styling: Tailwind CSS, Angular Material, Responsive Design, Accessibility, Component-Driven Development

Testing & Quality: Jest, Angular TestBed, Unit Testing (85%+ coverage), Clean Code, Code Reviews

Tools & DevOps: Git, GitHub, GitLab, Docker, Docker Compose, Ubuntu Linux, Tomcat

Methodologies: Agile, Scrum, Kanban, Cross-Functional Collaboration

LANGUAGES

Spanish: Native | English: Intermediate (technical documentation, technical reading and written communication)
